The Chief Editor,
African Journal of Health, Safety and Environment (AJHSE)
eISSN: 2695-1819 | pISSN: 2695-2386

Dear Editor,

Please find enclosed a manuscript titled: "Title" which I am submitting for exclusive consideration for publication as an article in African Journal of Health, Safety and Environment (AJHSE). I am sending this manuscript for review as it [i.e Article relevance]:

- State clearly the reason why your study is important and relevant to the journal’s readership or field.
- State clearly the questions your research answers.
- State clearly the methods used.
- State clearly the major experimental results and overall findings.
- State clearly the most important conclusions that can be drawn from your research.
- A statement that the manuscript has not been published and is not under consideration for publication in any other journal
- Also, a statement that all authors approved the manuscript and its submission to the journal.
- Any other details that will encourage the editor to send your manuscript for review.

As such, this paper should be of interest to a broad readership including those interested in: [what kind of research, topics, techniques etc].

Knowledgeable external reviewers for this paper might include (optional):

**External Reviewer:** 1
[Name, Qualification and Affiliation] (Email Address/Phone Number)

**External Reviewer:** 2
[Name, Qualification and Affiliation] (Email Address/ Phone Number)

**External Reviewer:** 3
[Name, Qualification and Affiliation] (Email Address/ Phone Number)

Thank you for your consideration of my work. Please address all correspondence concerning this manuscript to me and feel free to correspond with me by e-mail and phone.

Best regards,

STEPS TO MANUSCRIPT GENERAL FORMATTING

Before you start preparing your manuscript, kindly make these settings to your Microsoft word document. This will be applied to all pages:

1. **Margin**: Normal (1,1,1,1)
2. **Gutter position**: Left
3. **Line spacing**: 1.5
4. **Paragraph**: Indent (1/2 inch)
5. **Text align**: Justify
6. **Paragraph text size**: 10
7. **Font type**: Times New Roman

**AJHSE Manuscript Word Count**:

1. **Total Article Word Count**:
   Your entire article including its Abstract, Introduction, Main body of the article, Conclusion and Reference List:
   a. **MUST NOT** exceed Four Thousand (4,000) Words for Research Articles
   b. **MUST NOT** exceed Five Thousand (5,000) Words for Review Articles

2. **Title Word Count**:
   Your Article Title **MUST NOT** exceed Twenty (20) Words.

3. **Abstract Word Count**:
   Your Abstract alone **MUST NOT** exceed Two Hundred and Fifty (250) Words.
IMPACT OF IMPROPER WASTE DISPOSAL ON HUMAN HEALTH

**ABSTRACT**

The African Journal of Health, Safety and Environment (AJHSE) is a multidisciplinary platform for the dissemination of accurate, authoritative and timely information of research, review, case studies and short communications on scientific issues which borders on the health, safety and environment of the biological systems of our planet for professionals across the globe in print and online versions. The African Journal of Health, Safety and Environment (AJHSE) wishes to invite researchers, scholars, scientists and professionals, in all areas of human health, global safety and environmental sustainability to submit their original research and review articles for its peer review, quarterly, open access publication.

**Keywords:** academic papers, authors, free publication, journals, Nigeria, open access, research articles.
INTRODUCTION

Health, Safety and Environment Research is about finding out new knowledge that could lead to changes in quality health and safer environment. There are many types of research from studies in a scientific laboratory to those that observe in the field and through examination by researchers with different conditions or new methodologies. HSE Research is mainly concerned with preventing disease and promoting good health as humans interact with the environment constantly. Environmental health consists of preventing or controlling disease, injury, and disability related to the interactions between people and their environment. Thus, creating healthy environments can be complex and relies on continuing research to better understand the effects of exposure to environmental hazards on people’s health.

NOTE: Aim and Objectives, Purpose of Research, Research Justification and Hypothesis should come under the Introduction Section as sub-sections.

SUB-SECTION HEADINGS

Authors may use this Microsoft (MS) Word template by employing the relevant styles from the Styles and Formatting list (which is accessed from the Format menu). Care must be exercised in using the styles to obtain the desired format. To view which style is being used in any part of this document, place the cursor on the line and look in the style list.

Further Subsections

Authors are strongly encouraged to follow the principles of sound technical writing, as found in Ref. 1, for example. In addition, good English usage is essential. Authors whose native language is not English may wish to collaborate with a colleague whose English skills are more advanced. A spell checker can be helpful to discover misspelled words, but authors should also proofread their papers carefully prior to submission. Manuscripts that do not meet acceptable English standards or lack clarity may be rejected.

</table>

Source: Yoruba et al. (2019).

(Tables = font size: 10; Case: Sentence; Align: Left; Tables should be in the center of the page)
Tables are numbered in the order in which they referred to. They should appear in the document in numerical order and as close as possible to their first reference in the text. It is preferable to have tables appear at the top or bottom of the page, if possible. Table captions are handled identically to those for figures, except that they appear above the table. See Table 1 for an example.

**FIGURES**

![Figure 1: Economic indicators influencing public health 2009-2013](image)

*Source: Igbo et al. (2019).*

(Figure= font size: 10; Case: Sentence; Align: Center; Figures should be in the center of the page)

Figures are numbered in the order in which they are called out in the text. They should appear in the document in numerical order and as close as possible to their first reference in the text. It may be necessary to move figures or tables around to enhance readability.

Figures, along with their captions, should be separated from the main text by 0.2 in and centered. Figure captions are centered below the figure or graph. Figure captions start with the abbreviation “Fig.” in front of the figure number, followed by a period, and the text in 10-pt font. See Fig. 1 for an example.

**PARAGRAPH AND EQUATIONS**

The paragraphs should be in INDENT style i.e indentation at the beginning of every new paragraph except the first paragraph after a heading (1/2 inch). A colon is inserted before an equation is presented, but there is no punctuation following the equation. All equations are numbered and referred to in the text solely by a number enclosed in a round bracket (i.e., (3) reads as "equation 3"). Ensure that any miscellaneous numbering system you use in your paper cannot be confused with a reference [4] or an equation (3) designation. Page Numbering and Foot notes are not acceptable.

\[
2a = \frac{(b + 1)}{3c}
\]  

(3)

**NOTE:** Results/Finding, Discussion, Recommendation, Limitations and Conclusion Sections must be separate sections. No two of these sections should be merged into one.
REFERENCES

References should be indicated by giving (in parentheses) the author’s name followed by the date of the paper or book; or with the date in parentheses, as in ‘suggested by Yuksel (2015)’. In the text, use the form Brunero et al. (2015). where there are more than two authors, but list all authors in the references. References should be listed, as follows, in one alphabetical sequence at the end of the text.

NOTE:

1. Name of Journals in reference list must be spelt in full and italicized. E.g. *African Journal of Health, Safety and Environment* Not *Afri. J. HSE*
5. At least 50% of your reference list must have either DOI or URL included for easy verification E.g. doi:10.1080/15567030802462911 or http://ejournals.library.ualberta.ca/index.php/EBLIP/index
